Adele Webb 834-0033

(1) Letting citizen's save monthly energy monies by using "net metering" would help encourage use to buy the system's! Especially if power company sent us a check every 6 months or so.

(2) If my house "went solar" I would buy an electric car - helping improve air quality in Upstate

(3) Why doesn't the "Power" Company go into business installing solar systems + maintaining them? They used to sell appliances + finance them !!!

(4) Some States (Connecticutt + CA) already allow people to install their own solar roofing shingles — Could the State help the resident's Do that?

(5) At least 1/2 of state Buildings should go green — with plants or a solar system WHY NOT?

(6) Be Leaders!!
Inspire!!
Do Whole Neighborhoods for Low-income Housing to Demonstrate New Technologies — WHY NOT!!
