Docket Number 2005-385-E

Dear Mr Terreni - Public Service Commission of SC.

My family is planning on buying the Solar energy panels we feel this will help our family to conserve energy and if we were allowed to have Net energy in our state it would also help to lower our cost of buying oils from foreign countrys. Our State and our Country deserves this chance to prosper and not to be so dependent on others when we can do this for ourself.

Please give us, our state and our country this opertunity

Sincerly
John & Elaine Barbrey
