RE: SCPSC Docket 2005-385-E
Order No. 2006-680

Dear Sirs,

I urge you to support net metering for our state. It would be an important incentive for consumers to invest in renewable energy generation.

By approving the net metering of residential customers you would allow the citizens of South Carolina to have the option of investing in solar and other renewable energy technologies to offset their energy costs.

Sincerely yours,

R. Sam Jiddy
