Dear Sirs @ SCE+G

Now is not the time to increase just because everybody else is. It is difficult enough, with everything else. 2 weeks ago I received a letter saying "they are putting new meters." The I get my bill and it's increased. I have a garage out back, which maybe "twice a year" I go and turn on the lights and the bill is increased from $7.- to 18.63 monthly which is wrong. I try to spend more time at work so I won't have to heat my house. Then when I come home, I go straight to bed with alot of blankets. So do not, enough is enough, no increase at this time people are sufvering already.
