Re: Docket 2009-489-E

The PSC should take a long hard look at some of the pay the big shots at SCANA get.

Also, do they really need private jets to fly them where and when they want?

Also look at some of the big shot travel - is it really company business?

Some of the above is paid for by little old ladies that sit in a dark house because they don't want to run up the light bill
