To: Members of the South Carolina Public Service commission.

I request an evening hearing by the commission in Anderson, S.C. in reference to Docket 2007-286-W/S.

If this commission is in the Public interest it will reject this outrageous request for another 50% rate increase.

Utilities Services of South Carolina (newly owned by Tom Pickens) received a 37% rate hike two years ago. Peoples wages never could keep up with such outrageous increases every 2 years. What accomplishment did they achieve with that first hike? Any accountability

I'm retired and resent the size of the last increase, well above the inflation rate and meager wage increase

By what measure did you grant such a large increase last time? U.S.S.C. Pays the same for its water supply as the city of Anderson charges county residents for water.
