Public Service Comm.

This is to inform you that I'm highly against you approving SCE&G's rate hike. People are struggling to pay their high electric bills now.

Please think of the poor people you will be hurting not to mention those who have riches and could pay. We have had enough of you people padding the already millionaires pockets with more and more. You need to have the balls to say no once in awhile.

But I guess money speaks louder than words from you people.
Oh You know all of you take kick backs from SCE&G. You always approve an increase to them.

God is watching all of you and if you think you all wont pay the price, think again. He will get even with you people.
Things will go wrong for you. Count on it.

Say no to any kind of raise for SCE&G. We are already paying for new plants that hasn't even been started. Where is your mind?
