222433

I recently discovered that SCEG has requested another rate hike. This is outrageous. Duke Power cost $93 per 1,000 KW and Berkley Coop is reducing their rate. I am on a fixed income and have a hard time buying my medications. For 1,000 KW SCEG cost $118 and a rate increase would put it at $130 this is higher than other investor owned utilities as well as publicly owned Santee-Cooper. We are in an economic struggle. Please don't allow this rate hike to happen. Please put the people of S.C. first.

Thank you
