Docket 2009-489-E

I am completely against an increase in rates. SCE & G is making huge profits and pocketing them and you people continue to raise the rates of the middle class. Do you not think that we can see what huge profits they are making? There needs to be some adjustments made on their parts if costs are increasing instead of continually passing it on to the consumer. If you don't let them pass it onto the consumer then they would act like any other business does and tighten their belts, maybe even have to do away with the clubhouse & pool on Lake Murray.

Sincerely,
Sue Oakley
