	Integration Study (58-37-60)			*July 5, 2019 Comments: "...the SCSBA recommends that this Commission initiate an integration study after this Commission has issued a final order in the avoided cost proceeding, and that it not consider an utility proposal for an integration charge prior to the completion of that study."					
Additional Comments.		*July 3, 2019 Comments: Numerous issues should be consolidated for judicial economy	*July 3, 2019 Comments: Nucor is a large industrial customer of DEP		*Does not currently intend to propose a procedural schedule	*July 5, 2019 Comments: DEP and DEC respectfully request that Docket No. 2019-176-E be administratively closed	*July 5, 2019 Comments: DESC asserts that establishing a consolidated procedural schedule in Docket No. 2019-176-E is both unnecessary and unwarranted and, if granted, would only serve to create confusion and unduly burden the limited administrative resources of the Commission and the parties	*July 5, 2019 Comments: SELC anticipates representing Conservation groups such as the SC Coastal Conservation League, Southern Alliance for Clean Energy, and Upstate Forever	*Vote Solar supports the procedural recommendations of the SBA, generally
		*The Commission shall first establish the methodology for each utility (June 25, 2019 Filing: e.g. seasonal allocation of capacity needs and costs, methodologies for projection of fuel costs as they relate to avoided energy cost, environmental cost avoided by individual or aggregated QFs)	*Proposes the Commission address the issues in these cases in utility-specific dockets because utility-specific proceedings would better allow the parties and the Commission to consider each utility's Avoided Cost proposal in light of the facts and circumstances unique to each utility		*ORS intends to work with the other parties, as well as the Commission Staff, in establishing schedules which are acceptable to all	*June 20, 2019 Comments: "Accordingly, it would be wholly improper for the Commission to adjudicate these issues without an opportunity for discovery, testimony, or an evidentiary hearing."		*SELC supports the procedural schedule recommended by SC SBA and JDA	
		*Then utilities make Avoided Cost filings - the Act requires the methodology for each utility to be set with input guidelines and transparency before Hearings on the actual rate	*July 3, 2019 Comments: Nucor's only concern is with DEP's proposal			*July 5, 2019 Comments: For purposes of judicial economy and efficiency, the Companies have recommended the Dockets assigned to DEC and DEP be consolidated.

Additional Comments:		*Adequate time for intervention and discovery per state's policy of encouraging renewable energy.		*SC SBA opines the Commission should establish a procedural schedule for late 2019 or early 2020, which would provide enough time for the Commission to issue an order clarifying IRP requirements and for electrical utilities to subsequently file IRPs in compliance with those requirements prior to the end of 2020.	*Each electric utility file an updated Integrated Resource Plan to be approved by the Commission as outlined by S.C. Code Ann Section 58-37-40(A), beginning in 2020, which meets the new requirements as outlined by 58-37-40(B)(1)	*If the Commission desires to implement additional rules regarding IRPs such rules should be adopted pursuant to a rulemaking proceeding		*Ideally establish a schedule that completes the generic docket in the first half of 2020, such that jurisdictional utilities can file IRPs in accordance with their plans and [Dominion Merger] settlement requirements by late 2020.	*Vote Solar supports the procedural recommendations of the SBA, generally
		*JDA opines the Commission should establish a procedural schedule for late 2019 or early 2020, which would provide enough time for the Commission to issue an order clarifying IRP requirements and for electrical utilities to subsequently file IRPs in compliance with those requirements prior to the end of 2020.			*Establishing a uniform format that follows the updated Integrated Resource Plan requirements as related to Section 58-37-40(B)(1) to be used by all electric utilities	*No rulemaking is required under Act 62 and it is premature to require one before the utilities are allowed to file IRPs in compliance with Act 62		*There should be a significant opportunity for interested party input to the utilities and Commission.	
					*Each electric utility file an Integrated Resource Plan in a separate Docket staggered throughout 2020 for Commission approval

SELC supports an opportunity for stakeholder engagement and collaboration, such as the procedure outlined by Vote Solar in its July 3, 2019, filing in these proceedings. This kind of stakeholder process could be conducted informally by the parties before the initial testimony deadlines. SELC agrees with other interested parties that the deadlines for this proceeding may be set in late 2020 and early 2021."
