OD 3/22/10 Docket 2009-489-E 222880

To: 03/18/2010
SC Public Service Commission:

Enough, enough, enough! That's what we have to say about the rate hikes. People on fixed incomes have a hard enough time.

Who needs two new nuclear reactors? Other countries are reducing the number of reactors and are relying more on alternate sources of power. Why can't we do that? How about the Bloom Box, hopefully the initial cost will go down and everyday people can afford it. SCR+G is a monopoly and knows it can get what it wants. It's all for the share holders, not the consumer.
