Dear Members,

My wife and I are retired and do not feel that the rise in electric rates, as proposed by Duke Power is appropriate at this time.

Our budget is already at the upper limit of our income and with the wild economy we think that Duke Power, as a public utility, should not be raising rates.

The stock holders of Duke have to realize that we are all in this together and they as well as the rest of the S.C. population & businesses have to all knuckle down together!

I think the golden rule should be followed: "Do unto others as you would have others do unto you"

Thank you for your attention!
