To whom it may concern,

Duke Energy is going up on the power again. I am unemployed and my benifits have run out. I am 58 and unable to work because of helth problems. I get just enough money from my family to pay what little I can now. This doesnot include Dr. visits or Medications. I live off of $400.00 A month. If it wasn't for food stamps I would have no groceries. There are thousands of us in SC. in the same boat and winter is almost here. I heat with electric and my house stays cold because I can not afford the higher power bills.

Please Keep Duke Energy from increasing the rates. I do all I can to pay it now.

Sincerly
Janet Lawson
