223205

Irmo, South Carolina

Docket # 2009-489-E

To Whom it Concerns:

I oppose the $1 billion nuclear plant - It's dangerous & all the other updates in my Town of Irmo is needed.

Right now the power is out probably because the wind is blowing & these transformers on a stick can't handle it with all the lines everywhere. Why can't you put all these lines in the ground.

The SCE&G man on the phone says it takes time. I've been here 26 yrs. & have not seen any updates on your system but higher bills.

To repeat myself I OPPOSE THE BILLION DOLLAR NUCLEAR PLANT - Use water, solar, & wind before you kill us all!!!
