To: Public Service Commission of South Carolina

This letter is in Regards to the increase that SCE&G wants to put upon the peoples of South Carolina.

I am totally against this increase because peoples are struggling now to pay "high" cost of Electric & gas bills. Everything is going up except our "pay checks" so that leaves the average family struggling even more.

I've seen older peoples struggling on fixed in-comes to pay their electric & gas bills. And my family & I are also in that list of peoples. So yes I am against the increase.

Ever this new way of reading the meter seems to have taken our bill up higher. The old way was much "honest", Company will mess up & the peoples have to pay for it.

I will pray that God will raise up another Electric & gas company, in our county, so that SCE&G will have some competition & then maybe they will lower their rate.

Thank you
