Why don't the large companies that this rate hike will hurt the most, start to check what goes on with the deals that are made between State Senators, Congressman and reps the CEO of SCE&G send to State Capital. They give them trips gifts + bonus to pass there rate hikes, they should all be sent to prison. The average person can't do this and our State law officers are no good and are probly on SCE&G. Pay Roll too. SCE&G are becoming the most hated Company in SC. They can not pay for there expansion because they gave there profit to 15 or 20 maly more expective who does nothing for the Company, Just milk the company and sit on there fat lazyass. The same thing happened to big Banks and car makers thanks for listing to my story. Have a great day
