DD3410

February 25, 2010

Attn: Public Service Commission of S.C.

This letter is to inform you that I do not believe it is necessary to increase the electric bill.

There is a recession going on and we all have a hard time paying our monthly bills when our paychecks are not increasing or not there to pay the bills. Businesses are cutting back employee's or their services to compensate for larger bills they receive.

Please have mercy.
