It appears that there is no thought of the consumer when deciding whether or not to let them be an increase in the rates of SCE+G Rate increase by the Public Service Commission.

We the consumers ask you to please rethink your concern for the consumer sake.

Why should the consumer have to pay for Project Sucker building a Nuclear plant. This is not just business trades. It places this is not just business trades. It places a burden on consumers for payment. This is highly unfair with no benefit to consumers such as myself.

HELP!! is what we are asking to end their unfair practices!!
