NOV 07 2011

Im writing in protest of Docket # 2011-271-E about the 17% proposed rate in elect. from Duke Energy.

What was their profits last year 2.5 billion dollars or something?

Greed is associated with evil. They will probably get a big increase, what's people to do but pay it.

Gas companies making unbelievable fortunes, Drug companies also.

The rich get richer and poor barely makes it, that's the way its always been.

The 2 billion Duke made last year, what about all the money they've made since their existance what, 80-100 years ago?

What it is their stock holders and investors want a bigger return for their money, because people are conserving energy and Dukes projected use is down from what they expected for the future.

Why dont people buy Deisel

powered generators and make their own elect?

Duke has to buy back from you if you make more than you use.

People have turned away from the Almighty God in these last days to the almighty greed for the dollar, which in the end will be worth nothing.

Thank You
Lenny Clark
