RE: Docket No. 2008-196-E

As an SCE&G customer, I would like for the Public Service Commission to address on Wednesday, July 16 2008, the site preparation plans for the Jenkinsville nuclear plant. The motion needs further review from the Commission, in addition to adequate information given to the public as to such proceedings. According to Docket No. 2008-196-E, public opinion should be taken into consideration in such a matter. Thank you for your consideration.

Sincerely,

Stephanie Powell
