Re: Pocket 2009-489-E

The PSC should take a long hard
look at some of the fray the
big shots at SCANA got.

Also, do they really need private
jets to fly them where and
when they want?

Also look at some of the big
shot travel - is it really company
business?

Some of the above is paid for by
little old ladies that sit in a
dark house because they don't
want to run up the light bill.
