Mr. Charles Terreni,
Public Service Commission
Docketing Department, Docket # 2008-176-E
P.O. Drawer 11649
Columbia, SC 29201

Dear Mr. Terreni,

I am writing to object to allowing SCE & G to start building their nuclear plant even before there has been an environmental impact statement. This new power plant could play havoc with our water supply, especially in the dry climate conditions we are having. Also, the sale of power may be sold out of state — leaving S.C. to deal with the environmental damage!

Sincerely,
Connie Hudson
