March 16, 2010

SC Public Service Commission
19, Executive Center Dr.
Suite 100
Columbia, SC 29210

Sir/Madam:

I refer this correspondence to you in an effort to stymie or at least to greatly reduce SC 546’s effort to request another rate-hike.

What other corporations can expand and continually tax on projects and receive dollars almost all of the finance from their customers? (Especially when they have no choice if they want to stay warm in the winter and have their lights on.) The top executives at Scurra are paid way above the realistic level of compensation.

We are simply middle class residents of the Upstate but we see many of friends and family trying to figure out how to handle...
The increased amount the SCB66 group is proposing.

Please at this time, just once time. Don't give them a "pocket" at the Commission. You have held this hard long enough—think of the incidents at the time, that are hurting from the economic Crunch.

Sincerely,

Bobby and Susan Metton
119 Forbidden Lane
Columbia, SC
29012

Note: I presently own 4100 shares of Lanna Stock. I'm asking for fairness at the hearing by the Commission in the near future.
