**Re: Lisa M. Meserve v. Duke Energy Carolinas, LLC  
Docket No. 2016-366-E**

Dear Ms. Shealy,

My mother, Mary Louise Luciano and I have a medical emergency involving our health in our own home due to the RF radiation coming from the EMF-emitting AMR meters.

We cannot agree to your request for abeyance unless immediate relief is granted whereby the two current AMR meters be replaced with electromechanical analog meters with no RF capabilities which we are happy to provide if Duke Energy does not currently have any. These are ready for installation by Duke Energy or a licensed electrician of our choosing. These meters are calibrated and certified to be accurate.

Respectfully,

Lisa M. Meserve

C.C.
