SOUTH CAROLINA ELECTRIC & GAS COMPANY – COMBINED APPLICATION FOR CERTIFICATE OF ENVIRONMENTAL COMPATABILITY AND PUBLIC CONVENIENCE AND NECESSITY AND FOR A BASE LOAD REVIEW ORDER

SCE&G states in the Application that in order to meet the growing demands and needs of its customers for electric power, to support the continued economic development and prosperity of the State of South Carolina, and to maintain the reliability of its electric system, the Company plans to construct two nuclear generating units, namely, AP1000 Advanced Passive Safety Power Plants (“AP1000”), located near Jenkinsville, South Carolina and approximately one (1) mile from Summer Station Unit 1. The AP1000 units, identified in the Application as Unit 2 and Unit 3, and associated facilities will be jointly owned by SCE&G and the South Carolina Public Service Authority. According to the Application, the AP1000 represents an advanced nuclear generating design that has been approved and certified by the United States Nuclear Regulatory Commission. Moreover, the Company states that the AP1000 units and associated facilities will be constructed by a consortium consisting of Westinghouse Electric Company, LLC and Stone & Webster, Inc. SCE&G anticipates that AP1000 Unit 2 and Unit 3 will become operational in 2016 and 2019, respectively.

SCE&G further requests in its Application authorization to revise its current schedules of electric rates and charges to add the incremental revenue requirements associated with Construction Work In Progress resulting from the Company’s investment in the nuclear generating facilities described above during construction. The Company requests that the proposed increases be effective beginning March 2009. The proposed average increase to the residential class is 0.52%; small general service class is 0.48%; medium general service class is 0.51%; and large general service class is 0.44%. Amount and percentage increases vary by rate schedules within these classes, and individual customer bill increases may also vary depending upon actual usage patterns and amount of consumption. Additionally, basic facilities charges are subject to change.
