In reference to the rate hike request of S.C.E.G., we are very much opposed to it. As retired and senior citizens, we, as many others are on fixed incomes and we get no raises. We simply cannot afford for rates to keep increasing. We are now on an equal payment plan and we find that it is still hard to pay.

We feel that it is very unfair for S.C.E.G. to ask for a rate increase during this time of recession and many people are out of work. It seems that every time we turn around, they are asking for another rate increase. Are they thinking about their customers or money?

Thank you,

Charles & Besnie Robertson
