Subject: VC Summer Plant; I want my money back; I want no more future payments for Summer Plant.

**Greetings,**

A principle of utility rate design is that charges should be for expenses that are used, useful and prudent. The cancelled V C Summer Nuclear Plant is neither used nor useful. And it may be argued that it was not prudent for SCANA / SC&G to have taken on the project.

- I want all my money back that I have already paid into the cancelled V C Summer Nuclear Plant. By my calculations I have paid in about USD 3,500.00. I want all that money back.  
  - The USD 1,000.00 offered by Dominion Energy is far less that the approximately USD 3,500.00 I have paid in so far.  
- I do not want to pay anything into the future for the cancelled V C Summer Nuclear Plant.  
  - The 7% roll back in rates offered by Dominion Energy is far less that what I understand to be the full amount of 18% rollback in rates.

Furthermore, the Base Load Review Act of the Legislature apparently bypassed the State’s utility regulator and regulatory rate making procedures. Hence, it may be argued that the Base Load Review Act is illegal, particularly the portion of the Act that obligates the rate payers to pay for projects even if the project fails.
Thank you for your attention to this matter.

Regards,

Michael Hajny
