To Whom it May Concern,

It seems apparent that no one is responsibly representing the customers of SCE & G. We are footing the bill for building nuclear power plants, and the costs keep uncontrollably rising! It appears that no one is held responsible or accountable for the rising costs. In the course of normal business in the USA the CEO and some of the Board Members would have already been terminated. But in this case things just keep rolling along. Why during this period is SCE & G allowed to pay bonuses and dividends? If the ratepayers have to keep footing the bill; shouldn't the amount they are contributing be treated like an investment? Therefore accumulating interest and then receiving payback through future rate adjustments. This time I hope the Public Service Commission does the right thing and represents THE PUBLIC! NO INCREASES WITHOUT A PAYBACK PLAN AND ALSO HOLDING THE PEOPLE WHO ARE RESPONSIBLE FOR THE OVERRUNS ACCOUNTABLE!!

Sincerely,

William & Pauline Baylis
