Dear Sir, or Madam,

I'm writing concerning the 10 percent increase. I wonder if you still think about the disabled or the poor people or you don't care not to be rude. But I am disabled and on a fix income, since a month is not enough to pay my bills and light bill for this month already take leave of my check, I can't even afford to keep my car or pay insurance. I have to pay rent, water bill, phone bill, because of health condition I need my phone. By the time I paid all that which I don't have enough because of light bill, I have to take the government bus to doctor's appointment, and I have to try walking to the store to pick up a few packages. Can't even afford to shop. I understand about environment but what about the poor, elderly disabled whose struggling now for heat light. Majority of people are cooking why need in this difficult economic time. It's a great depression time for lot of people. No jobs, no home, some don't have cars anymore. Trying to make it when y'all came up with more depressing news by going it 10 percent. Bount's goes up without telling you. Because they no care.
need water just like we need light. And forbid He Jesus created the world for his glory not man's. We'd suppose to have love and peace. My God you trying to kill people with their eyes wide open. My light bill for this month is $296.00. How can that possibly be? I can't afford to pay it. I tried the tenant united way to no avail. When you don't have transportation you can't get very far. Try calling never get through. I really truly need the help. I would also love to come to the public meeting but have no way of getting there. I need my voice to be heard. Honestly can't afford these high electric bills.

Please help me if you can or try not the # to let this increase came to pass. Thanks you for listen, as I try my best.

Sincerely
Elois Johnson
