Re: South Carolina Electric & Gas’s Combined Application for Certificate of Environmental Compatibility, Public Convenience and Necessity and for a Base Load Review Order
Docket No. 2008-196-E

Dear Mr. Terreni:

Please accept this letter as comments to South Carolina Electric and Gas’s (“SCE&G’s”) Petition for an Order permitting commencement of construction activities related to two nuclear facilities to be located at the V.C. Summer Nuclear Station site near Jenkinsville, South Carolina. The South Carolina Office of Regulatory Staff (“ORS”) does not oppose commencement of construction activities as S.C. Code Ann. 58-33-110(7) states that such related activities are at the Company’s risk. This statute also states that permission to proceed shall not in any way indicate approval of the proposed site or facility. Ratepayers will not be responsible for such costs unless they are deemed prudent pursuant to the Base Load Review Act.

Sincerely,

Re: South Carolina Electric & Gas's Combined Application for Certificate of Environmental Compatibility, Public Convenience and Necessity and for a Base Load Review Order
Docket No. 2008-196-E

Dear Mr. Terreni:

The South Carolina Office of Regulatory Staff (“ORS”) is in receipt of the letter jointly filed by CMC Steel South Carolina and the South Carolina Energy Users Committee (“SCEUC”) requesting a procedural schedule extension in the above matter.

ORS agrees with the assertions and reasoning set forth in the letter. The information to be studied and reviewed is voluminous. The parties will not be known until August 20, 2008. All will be better served by providing an extension of time.

Sincerely,

Shannon Bowyer Hudson
Counsel for ORS
