IN RE: Petition of South Carolina Electric & Gas Company for Updates and Revisions to Schedules Related to the Construction of a Nuclear Base Load Generation Facility at Jenkinsville, South Carolina

ORDER APPROVING SCE&G’S REQUEST FOR MODIFICATION OF SCHEDULES

I. INTRODUCTION

This matter comes before the Public Service Commission of South Carolina (the “Commission”) on the Petition of South Carolina Electric & Gas Company (“SCE&G” or the “Company”) for an order approving an updated capital cost schedule and an updated construction schedule for the construction of two 1,117 net megawatt (“MW”) nuclear power units to be located at the V.C. Summer Nuclear Station near Jenkinsville, South Carolina (the “Project” or “Units”). SCE&G filed the Petition in this docket (the “Petition”) on May 26, 2016, pursuant to S.C. Code Ann. § 58-33-270(E) (2015). Under that provision of the Base Load Review Act (the “BLRA”), a utility “may petition the commission…for an order modifying any of the schedules, estimates, findings, class allocation factors, rate designs, or conditions that form part of any base load review order.” S.C. Code Ann. § 58-33-270(E). Further, “[t]he commission shall grant the relief requested if, after a hearing, the commission finds…that the evidence of record justifies a finding that the changes are not the result of imprudence on the part of the utility.” Id.
The Project has been the subject of a number of previous proceedings before this Commission. In Order No. 2009-104(A), dated March 2, 2009, the Commission approved an initial capital cost schedule and construction schedule for the Units. As approved in that order, the capital cost for the Units was $4.5 billion in 2007 dollars. With forecasted escalation, this resulted in an estimated cost for the Units at completion of $6.3 billion in future dollars. The construction schedule approved in Order No. 2009-104(A) anticipated that Unit 2 would be completed by April 1, 2016, and the project as a whole would be completed by January 1, 2019. In 2009 SCE&G filed its first petition under S.C. Code Ann. § 58-33-270(E) (an “update proceeding”) seeking an update to Project cost schedules. In Order No. 2010-12, dated January 21, 2010, the Commission approved the updated schedules. Subsequent update proceedings were filed in 2010 (approved by Order No. 2011-345) and in 2012 (approved in Order No. 2012-884).

Prior to this proceeding, the last Petition filed by SCE&G pursuant to S.C. Code Ann. § 58-33-270(E) was filed on March 12, 2015. In that Petition, SCE&G sought an order approving an updated construction schedule and updated capital cost schedule for the Units. In Order No. 2015-661, dated September 10, 2015, the Commission approved an updated construction schedule with new substantial completion dates for Units 2 and 3 of

1 Unless otherwise noted, all dollar amounts used in this Order reflect the cost associated with SCE&G’s 55% share of the ownership of the Units. Unless otherwise noted, amounts other than those associated with the October 2015 Amendment to the Engineering, Procurement and Construction Agreement (or “EPC Contract”) and the option it contains are expressed in 2007 dollars. For those two items, amounts are expressed in future (i.e., escalated) dollars.
June 19, 2019, and June 16, 2020, respectively, and an updated capital cost estimate of $5.2 billion in 2007 dollars.

II. UPDATE PETITION IN THIS DOCKET

The updated Petition under consideration in this docket has been modified from what was proposed in SCE&G’s Petition by a settlement (“Settlement Agreement”) entered into by a number of parties (and discussed below), and entered into the record as Hearing Exhibit 1. The updated construction schedule under review here was Exhibit 1 to the Settlement Agreement. This updated schedule revises the substantial completion date of Unit 2 to August 31, 2019, and of Unit 3 to August 31, 2020, a delay of approximately two and one-half months for each Unit compared to the dates established in Order No. 2015-661.

The updates to the cost schedule which result from the settlement are set out in Exhibit 2 to the Settlement Agreement. This schedule increases the anticipated cost of the Units by $831.3 million in future dollars to $7.658 billion or by approximately 12.2% compared to the forecast of $6.8 billion reflected in Order No. 2015-661. These increases in anticipated costs are related to:

(a) Adjustments to the EPC Contract price associated with the October 27, 2015, Amendment to the EPC Contract (the “Amendment”);

(b) The additional costs associated with the exercise by SCE&G and Santee Cooper of the option to transfer to the Fixed Cost categories all but a limited set of costs to be paid under the EPC Contract after June 30, 2015 (the “Option”);
(c) Eleven individual change orders under the EPC Contract which involve such things as site physical security upgrades and security system upgrades, the construction of additional shop and office space for support personnel who will operate the Units, and additional personnel to train operations and maintenance personnel;

(d) Increases in Owner’s Costs principally associated with the extension of the completion dates for the Units and additional project oversight resources to ensure the safety and quality of the work, and

(e) Associated escalation and Allowance for Funds Used during Construction (“AFUDC”).

The cost forecast presented in Hearing Exhibit 11 also reflects the reversal of a credit for future liquidated damages payments of $85.5 million. This credit had been included in the cost projections approved in Order No. 2015-661, but was no longer applicable because of revisions in the Guaranteed Substantial Completion Dates ("GSCDs") of the Units. Chart A below details the elements of the current request as per the Settlement Agreement:

III. NOTICE, INTERVENTIONS, AND HEARING

In compliance with S.C. Code Ann. § 58-33-270(E), SCE&G provided timely notice of the Petition in this docket to the South Carolina Office of Regulatory Staff (“ORS”). Pursuant to S.C. Code Ann § 58-4-10 (2015), ORS is automatically a party to this proceeding. By letter dated June 2, 2016, the Commission’s Clerk’s Office instructed the Company to publish by June 17, 2016, a Notice of Filing and Hearing in newspapers of general circulation in the area where SCE&G serves retail electric customers (the “Newspaper Hearing Notices”). The Clerk’s Office also instructed SCE&G to provide proof of newspaper publication by July 8, 2016. On June 20, 2016, the Company timely filed affidavits with the Commission demonstrating that the Newspaper Hearing Notices had been duly published in accordance with the instructions of the Clerk’s Office.

By letter dated September 15, 2016, the Commission’s Clerk’s Office instructed the Company by September 21, 2016, to publish a Notice of Public Night Hearing to be held on Tuesday, October 4, 2016, as a display ad in the local section of the following newspapers: The State, The Aiken Standard, The Post and Courier, and The Beaufort Gazette/Island Packet (the “Newspaper Night Hearing Notices”). The Clerk’s Office also instructed SCE&G to provide proof of publication of the Newspaper Night Hearing Notices by September 23, 2016. On September 22, 2016, the Company filed with the Commission affidavits demonstrating that the Newspaper Night Hearing Notices had been duly published in accordance with the instructions of the Clerk’s Office.

Uncontested Petitions to Intervene in this docket were received from Frank Knapp, Jr., Central Electric Power Cooperative, Inc. (“Central Electric”); The Electric
Cooperatives of South Carolina, Inc. (“The Cooperatives”); Sandra Wright; Sierra Club; the South Carolina Energy Users Committee (“SCEUC”), South Carolina Coastal Conservation League (“CCL”) and CMC Steel South Carolina. These Petitions were granted by this Commission. However, by Order No. 2016-525, Mr. Joseph Wojcicki was denied intervention on the ground that he is not a customer of SCE&G.

A hearing was held beginning on October 4, 2016, at 10:30 AM in the Commission’s hearing room. SCE&G was represented by K. Chad Burgess, Esquire, Matthew W. Gissendanner, Esquire, Belton T. Zeigler, Esquire, and Mitchell Willoughby, Esquire. SCE&G presented the testimony of Kevin B. Marsh, Stephen A. Byrne, Jimmy E. Addison, W. Keller Kissam, Kevin R. Kochems, and Joseph M. Lynch. The Electric Cooperatives of South Carolina and Central Electric Power Cooperative, Inc. were represented by Frank R. Ellerbe, Esquire, and John H. Tiencken, Jr., Esquire. These two parties presented the testimony of Michael N. Couick. Ms. Sandra Wright intervened in the case and represented herself at the hearing. Ms. Wright presented no witnesses. The South Carolina Energy Users Committee was represented by Scott Elliott, Esquire. SCEUC presented no witnesses. Frank Knapp, Jr. intervened in the case and represented himself at the hearing. Mr. Knapp presented no witnesses. CMC Steel South Carolina did not appear at the hearing, but was otherwise represented by Damon E. Xenopoulos, Esquire, and Eleanor Duffy Cleary, Esquire. The Sierra Club was represented by Robert Guild, Esquire. The Sierra Club presented no witnesses. The South Carolina Coastal Conservation League was represented by J. Blanding Holman, IV, Esquire, and Gudrun Elise Thompson, Esquire. CCL presented the testimony of Alice Napoleon. The Office of
Regulatory Staff was represented by Shannon Bowyer Hudson, Esquire, and Jeffrey M. Nelson, Esquire. ORS presented the testimony of Gary C. Jones and Allyn H. Powell. An evening public hearing was also held on October 4, 2016, for input from members of the public.

IV. SETTLEMENT AGREEMENT

In September of 2016, after the pre-filing of direct testimony by SCE&G and after all parties had been afforded a full opportunity to conduct discovery in this matter, ORS filed the Settlement Agreement with the Commission. It was executed by ORS, SCE&G, Central Electric, the Cooperatives, Frank Knapp, Jr. and SCEUC (the “Settling Parties”). The remaining parties, the Sierra Club, South Carolina Coastal Conservation League, Sandra Wright, and CMC Steel South Carolina, did not sign the Settlement Agreement. The Settlement Agreement is attached to this Order as Order Exhibit No. 1.

The Settling Parties propose that the Settlement Agreement and the modified construction schedule and capital cost schedule attached to it “should be accepted and approved by the Commission as a fair, reasonable and full resolution of all issues” in this proceeding. Hearing Exhibit No. 1 at 14. These schedules reflected the new GSCDs for the Units as contained in the Amendment. The modified construction schedule is attached as Exhibit 1 to the Settlement Agreement. The Settlement Agreement also reflected the Settling Parties’ agreement to an adjustment in the capital cost schedules for the Units of $831.3 million, which is a reduction of $20.45 million from the adjustment requested in the Petition in this matter. The modified capital cost schedule that results from the Settlement Agreement is described in the testimony of ORS witness Powell and set out in
Exhibit AHP-1, entered into the record as Hearing Exhibit 11. The resulting adjustment would create a BLRA approved capital cost for the Units of $7.658 billion.

In the Settlement Agreement, SCE&G agreed to several terms that are not reflected in the attached construction or cost schedules. First, SCE&G agreed to fix the price to consumers for EPC Contract costs according to the terms of the Settlement. To accomplish this, SCE&G agreed not to file for approval of additional capital costs associated with the construction of the Units unless the requests are related to certain specifically enumerated exceptions listed at the bottom of page 10, paragraph 12 of the Settlement Agreement. See also Tr. at 93-94. SCE&G also agreed that it will not seek recovery for any increase in Owner’s Costs associated with transfer of scopes of work from Fixed Cost Categories under the EPC Contract to Owner’s Costs categories. Tr. at 92. This prohibition will not apply if the scope of work transferred is to be completed under a fixed price agreement which is less than or equal to the credit (reduction) to the fixed EPC Contract price provided by Westinghouse as a result of the transfer. This provision provides the Settling Parties assurance that transfers of EPC Costs to Owner’s Costs will not result in cost increases in categories that are now subject to fixed prices under the Option.

These commitments in the Settlement Agreement will operate as a type of “Guarantee” by SCE&G shareholders of the Option, which is intended “to fix the price to consumers of the EPC Contract costs according to the terms of the Settlement [Agreement].” Settlement Agreement at ¶12. ORS’s witness Gary Jones testified that “the Guarantee is the most important aspect of the Settlement Agreement because that provision encourages accountability for construction costs and preserves the benefits to ratepayers
from electing the Option.” Tr. at 936. For that reason, the Guarantee “mitigates the risks associated with electing the Option.” Id. All witnesses who discussed the matter were clear that the terms of the Guarantee are as set forth in Paragraph 12 of the Settlement Agreement, and a definitive statement of its terms is to be found there.

Second, SCE&G agreed not to file new petitions to update the BLRA capital cost schedules for the Units prior to January 28, 2019. Tr. at 90. SCE&G also agreed that, prior to January 28, 2019, it will not seek revised rates reflecting capital costs greater than those approved in this Order. Both commitments are collectively referred to as the “Moratorium.” The January 28, 2019, date corresponds to the date on which SCE&G would expect to make its final revised rates filing prior to Unit 2 going into service. Furthermore, the Settlement also provides that the end date for the Moratorium will track the completion date for Unit 2 and will be extended day for day if the completion date is extended. As SCE&G witness Marsh indicated, capital costs that are not reflected in revised rates due to the Moratorium will continue to accrue AFUDC as envisioned under the BLRA. Tr. at 95.

Third, SCE&G agreed to place a $20 million cap on any BLRA recovery for amounts associated with the items listed as unresolved matters on Exhibit C to the Amendment. Tr. at 91. These were disputed items the parties were not in a position to resolve at the time the Amendment was concluded. This $20 million cap excludes two change orders related to Plant Security Systems Integration and Plant Layout Security, Phase 3. The $20 million cap provides the Settling Parties assurance that the additional costs of the Exhibit C items will not exceed a reasonable and quantified amount.
Fourth, SCE&G will calculate future revised rates filings using a return on common equity ("ROE") of 10.25% rather than the ROE of 10.5% that SCE&G agreed to in the settlement underlying Order No. 2015-661. Tr. at 92-93. This new ROE will be used in revised rates filings made on or after January 1, 2017, and prospectively thereafter until the Units are complete.

In support of the Moratorium, the Settlement Agreement revises the milestone schedule for the project to include only two uncompleted milestones. In support of this milestone change, the Settlement Agreement provides for greatly expanded and highly detailed reporting on schedule matters in the quarterly filings required under S.C. Code Ann. § 58-33-277(A) (2015). The milestones discussed in the Settlement Agreement are the substantial completion dates of the two Units. Reducing the remaining milestones in this way recognizes the fact that the substantial completion dates are the key milestone dates going forward and that customers are protected so long as those dates are met. However, if those dates are not met, protection for the customers is found in the form of new provisions governing liquidated damages, which cap liquidated damages at $371.8 million in aggregate for both Units. The current maximum is $86 million. The $371.8 million amount includes $137.5 million per Unit that Westinghouse must pay SCE&G if a Unit does not qualify for Federal Production Tax Credits. Completion incentives of $165 million are also included in the Amendment. Tr. at 418-419; 430. In addition, the Company intends to exercise the “Fixed Price” option for the EPC, agreeing to “fix the price to consumers for EPC Contract costs, according to the terms of the settlement.” Settlement Agreement at 10, ¶12. According to Company witness Lynch, the Fixed Price option will
save customers between 10.9% and 29.3% of the cost of the project. Tr. at 783. In addition, Westinghouse has made a corporate commitment to complete these Units successfully to protect its AP1000 business worldwide. Tr. at 418. Also, Westinghouse’s parent company, Toshiba Corporation, reaffirmed its guaranty of Westinghouse’s payment obligations under the EPC Contract. Tr. at 419. These terms are in addition to SCE&G’s commitment to “fix the price to consumers for EPC Contract costs, according to the terms of the settlement,” and the other terms of the Moratorium. Settlement Agreement at 10-12, ¶¶ 12-13.

Pursuant to S.C. Code Ann. § 58-33-270(G) (2015), the Settling Parties asked the Commission to hold a hearing on the Settlement Agreement along with the hearing for the Petition. They agreed that “the terms of the Settlement Agreement are reasonable, in the public interest and in accordance with the law and regulatory policy,” and that they “comport with the terms of the BLRA.” Settlement Agreement at 14-15. The Settling Parties asked the Commission to adopt the Settlement Agreement as part of its order in this proceeding. The Commission will rule on that request at the conclusion of its consideration of the evidence and issues raised in this proceeding.

V. STATUTORY STANDARDS AND REQUIRED FINDINGS

S.C. Code Ann. § 58-33-270(E) governs proceedings to update capital cost schedules and construction schedules that have been previously approved under the BLRA. Under this statute, the Commission must grant the relief requested if, after a hearing, the Commission finds “as to the changes in the schedules, estimates, findings or conditions, that the evidence of record justifies a finding that the changes [in previously approved

VI. FINDINGS RELATED TO COST AND SCHEDULE UPDATES

A. The 2015 Amendment to the EPC Contract

The amendment to the EPC Contract dated October 27, 2015, is attached to SCE&G witness Byrne’s testimony and is a part of Hearing Exhibit No. 10. The Option to transfer costs to the Fixed Cost category is set forth in a document pre-signed by Westinghouse that was attached as Exhibit D to the Amendment. Hearing Exhibit No. 10 at 23. The Amendment and the Option are of primary importance here because they represent more than 90% of the adjustments to the Project’s cost schedule that are proposed in this docket.

B. Overview of the Amendment and the Option

The Amendment and the Option were the result of negotiations involving SCE&G, Santee Cooper, Westinghouse, and Chicago Bridge & Iron (CB&I) that took place during September and October of 2015. Tr. at 56-57. Westinghouse requested a meeting with SCE&G and Santee Cooper during the first week of September 2015. At that meeting, Westinghouse disclosed that CB&I had decided to exit the new nuclear construction business and was requesting terms on which it could be released from its contractual commitments to this project and the sister project at the Vogtle site in Georgia. Tr. at 56.

At the September meeting, Westinghouse also said that, if CB&I were released from the project, Westinghouse would hire the Fluor Corporation (“Fluor”) to assume lead construction responsibilities as a subcontractor to Westinghouse. Fluor would not become a member of the Consortium. Tr. at 57. In order for Westinghouse to remove CB&I from
the project, SCE&G and Santee Cooper had to release CB&I from the direct parental guarantees that CB&I had provided to them. In response, SCE&G and Santee Cooper negotiated provisions (a) increasing liquidated damages, (b) restricting the grounds for future change orders, (c) eliminating calendar-based progress payments, (d) establishing a dispute review board and prohibiting litigation while construction was ongoing, (e) extending major equipment warranties to match the new GSCDs of the Units, and (f) resolving all but a limited number of the outstanding change order requests and other claims between the parties.

SCE&G and Santee Cooper also demanded and obtained from Westinghouse the unilateral and irrevocable Option to transfer all but a limited amount of work under the EPC Contract to the Fixed Price cost category. The Option would set a price of $3.345 billion for all EPC Contract invoices paid after June 30, 2015. Tr. at 432. That price would be subject to future change orders and a limited number of excluded scopes of work in the Time and Materials cost category. By terms of the Amendment, the exercise of this Option is subject to Commission approval, which SCE&G has requested in this proceeding.

The Amendment was signed on October 27, 2015. Effective January 1, 2016, Fluor assumed responsibility for construction work on site and began transferring CB&I’s craft workers to Fluor’s employment rolls. On July 1, 2016, SCE&G and Santee Cooper provided Westinghouse with an executed copy of the Option agreement subject to review and approval by the Commission. Tr. at 60.

In this proceeding, SCE&G is presenting the cost changes associated with both the Amendment and the Option for incorporation in the updated BLRA cost forecasts. As to
both sets of costs, the determinative question is whether the Commission can determine that “the evidence of record justifies a finding that the changes are not the result of imprudence on the part of the utility.” S.C. Code Ann. § 58-33-270(E). For the reasons stated below, the Commission finds that SCE&G has met this statutory standard and that these changes have been shown not to be the result of imprudence on the part of SCE&G. Under the terms of the BLRA, they are properly included in the updated cost forecasts for the Units.

C. The Decision to Incur $137.5 Million to Procure the Amendment was not the Result of Imprudence on the Part of SCE&G.

The record shows that SCE&G assessed the value of the Amendment as a single integrated package of costs and benefits. Based on the testimony of SCE&G witnesses and those presented by the ORS, in addition to the provisions of the Settlement Agreement, the Commission finds that this approach was reasonable. While it is known and quantifiable at this time that the cost of the Amendment for which approval is sought is $137.5 million, the terms of the Amendment are primarily intended to control future costs and improve the likelihood of meeting future schedule commitments. These forward-looking benefits can only be specifically quantified, if at all, when the Units are complete and the intervening circumstances are known. At the hearing in this matter, SCE&G adduced evidence that multiple benefits secured by the Amendment would be sufficient individually to justify the cost paid for it. This is cogent evidence that SCE&G was not imprudent in negotiating it. In sum, there is no basis in this record to conclude that the provisions of the Amendment or its costs are the result of imprudence by SCE&G.
SCE&G pursued two principal goals in negotiating the Amendment. One was to restructure the EPC Contract to support the timely completion of the Units. The second was to limit SCE&G’s and Santee Cooper’s exposure to future price increases under the EPC Contract. Tr. at 59-60. Each of the principal terms of the Amendment supports one or both of these goals. The provisions in the Amendment that principally support the timely and efficient completion of the Units include those (a) ending the divided structure of the Consortium, (b) allowing Fluor to become the construction lead for the project, (c) restructuring and increasing liquidated damages and completion incentives, (d) eliminating calendar-based progress payments, (e) resolving current disputes, (f) limiting future litigation, and (g) minimizing the grounds for future disputes. The principal provisions in the Amendment that limit the exposure of SCE&G and Santee Cooper to future price increases include provisions (a) amending the change in law provision of the EPC Contract, (b) specifying Design Control Document (DCD) Revision No. 19 to be the controlling document for purposes of the project, (c) providing an irrevocable Option to transfer most remaining EPC Contract costs to the Fixed Price category, and (d) resolving most of the payment disputes between the parties. The Commission finds that there is no evidence of imprudence regarding SCE&G’s decision to incur costs of $137.5 million in order to secure these benefits.

D. Approval of the Decision to Exercise the Option

In its Petition in this matter, SCE&G requested a ruling from the Commission affirming its decision to exercise the Option. In the Settlement Agreement the Settling Parties also urge that the Option be approved. SCE&G presented testimony by Dr. Lynch
showing that, in the most likely scenarios, the Option will save SCE&G’s customers between $118 million and $981 million. See Hearing Exhibit No. 12.

SCE&G’s witnesses testified that Westinghouse understands that it likely will incur costs under the Option that it cannot recover from SCE&G and Santee Cooper. Certain intervenors raised concerns about whether these costs are so great that Westinghouse might be driven to default on its obligations under the EPC Contract or seek to renegotiate the terms of the Option. Tr. at 566-67. That latter concern underlies ORS’s view that additional protections in the form of the Guarantee were required for ORS to accept the terms of the Settlement Agreement. Clearly, ensuring the benefits of the Option are not lost due to the magnitude of the obligation incurred by Westinghouse is a principal goal of ORS in negotiating the Guarantee. Of course, under any circumstance, it is best for SCE&G and its shareholders for Westinghouse to hold this risk.

A related question is what would happen if Westinghouse were to default on the EPC Contract and then prove to be insolvent. In that case, SCE&G would have recourse to the Westinghouse parental guarantee from Toshiba, which Toshiba has reaffirmed as part of the Amendment. Tr. at 419. Today, that guarantee would secure approximately $1 billion in SCE&G’s EPC Costs--or about a third of the amount currently remaining to be paid--against Toshiba’s publicly reported market capitalization of approximately $15 billion. In addition, approximately 85% of the equipment needed to complete the Units is now stored on site. Tr. at 414. SCE&G is currently implementing the rights it negotiated under the EPC Contract to place key software, design data and other intellectual property necessary to complete the Units in a third party escrow. Tr. at 458. The Settlement
Agreement requires SCE&G to complete this transfer. Furthermore, as a result of the Amendment, Fluor is now fully integrated into the project, managing the on-site construction work and insulated from direct Consortium liability. Even in the direst circumstances with reference to Westinghouse, SCE&G would not be without options to complete the project.

In the end, it is in the best interest of the project, SCE&G and its customers for SCE&G to exercise the Option and transfer to Westinghouse the price risk that the Option represents. The Commission hereby approves the exercise by SCE&G of the Option. The Commission further recognizes that the Guarantee further protects customers from the benefits of the Option being eroded by future events.

E. The Updated Owner’s Costs are not the Result of Imprudence On the Part of SCE&G

In its Petition and testimony, SCE&G identified an increase of $20.8 million in Owner’s Costs to complete construction of these Units. Tr. at 459. Owner’s Costs include all of the costs SCE&G must bear as owner of the project to oversee construction and engineering on the project. As the holder of active NRC Combined Operating Licenses (“COLs”) for the Units, SCE&G is directly responsible for ensuring the quality and safety of all work on-site and at suppliers worldwide. SCE&G also pays license fees to the NRC to cover its costs for inspection and oversight of the project and for maintaining the multiple NRC resident inspectors on site. Under the EPC Contract, SCE&G is contractually obligated to provide security and certain utilities for the site, as well as builder’s risk insurance and workers compensation insurance. Tr. at 825-26. To protect its commercial interests and those of its customers, SCE&G audits and reviews all invoices and requests
for payment associated with the project and bears the cost of disputing invoices and change order requests and enforcing its rights under the EPC Contract. As the prospective operator of the Units, SCE&G must recruit, train, and license the personnel needed to operate the Units and must draft and adopt the operating, maintenance and safety plans and procedures for the Units. SCE&G must accept the turnover of individual systems as they are completed by WEC and must test, operate, and maintain them pending completion of the Units. SCE&G must provide the facilities, Information Technology (IT) and other support required by these functions. The New Nuclear Development (“NND”) team comprises approximately 600 SCE&G, SCANA and Santee Cooper personnel who fulfill these tasks. Tr. at 530.

As a result of the Settlement Agreement, the Settling Parties agreed upon the inclusion of an increase of $30 million in Owner’s Costs. No party has presented any testimony challenging approval of SCE&G proposed updates to Owner’s Costs or the process by which the Owner’s Costs budgets are compiled. In the Settlement Agreement, the Settling Parties support approval of the proposed update to Owner’s Costs. The evidence of record clearly supports the finding by this Commission that the increase in Owners Costs is not a result of imprudence by SCE&G.

F. The Additional Costs Associated with Change Orders are not the Result of Imprudence.

The Company has identified 11 change orders and related matters that were not resolved through the Amendment. In its Petition, SCE&G requested an adjustment of $52.5 million to the EPC Contract cost for these 11 change orders. As a result of the
Settlement Agreement, the Settling Parties agreed upon the inclusion of $32.6 million of those costs. See Order Exhibit No. 1, ¶ 6.

The Company’s witnesses, Mr. Byrne and Mr. Kochems, provided detailed testimony concerning the justification, purpose and necessity for each of these 11 change orders and their associated costs. They affirmatively testified that the costs associated with each of the 11 change orders represent reasonable and prudent costs of completing the Units. Tr. at 396, 790, 815-24. In addition, ORS witness Powell testified in detail about the change orders and explained the ORS recommendation that this Commission should accept the Change Order costs of $32.6 million reflected in the Settlement Agreement. Tr. at 729-730.

The Commission finds that the increase to the EPC Contract of $32.6 million for the 11 change orders discussed above is not the result of imprudence by SCE&G. Therefore, these costs are properly included in the anticipated capital cost schedule for the Units as approved in the Settlement Agreement.

G. Approval of Updates to the Construction Schedule

The updated construction schedule presented in the Petition reflects the approximately two and one-half month change in the GSCD for each of the Units and other adjustments to intervening milestones. SCE&G witness Byrne testified that these milestone changes and the new substantial completion dates are based on extensive construction data WEC provided to SCE&G, and that SCE&G’s construction experts carefully reviewed and found the new schedule logical and appropriate. Tr. at 415-16. Mr. Byrne also testified that, in its role as the new construction manager for the project, Fluor
is conducting a full review of the construction schedule to ensure the GSCDs can be met and that any needed mitigation plans are put in place to support the schedule. Mitigation plans are being formulated to ensure that those dates are met. Mr. Byrne further testified that Westinghouse and Fluor have a reasonable construction plan in place to achieve the GSCDs. Tr. at 416. ORS witness Mr. Jones recommended that the Commission approve the proposed revised GSCDs, recognizing that these are contractual dates and accurately reflect what is included in the Amendment, subject to certain conditions regarding the BLRA milestone schedule. Tr. at 926.

Based on this evidence of record, the Commission finds that the revisions to the construction schedules for the Units presented in the Petition are reasonable forecasts of the time required for completing the Units and supported by the evidence of record in this proceeding. They are appropriate schedules for the project under the provisions of the BLRA both in their more detailed form as filed and as modified according to the terms of the Settlement Agreement and they are not the result of any imprudence on the part of SCE&G.

Recognizing, however, that Fluor’s fully resource-loaded construction schedule is still outstanding, this Commission directs SCE&G to report on the results of Fluor’s review and revision to the resource-loaded integrated project schedule when it is completed.

VII. COMMISSION ACCEPTANCE OF THE SETTLEMENT AGREEMENT

As discussed throughout this Order, this Commission has been presented with a comprehensive Settlement Agreement, joined by a number of parties who have asked that
the Settlement Agreement be approved under S.C. Code Ann. § 58-33-270(G). That provision, which is a part of the BLRA, provides the following:

The commission promptly shall schedule a hearing to consider any settlement agreement entered into between the Office of Regulatory Staff, as the party representing the public interest in the proceedings, and the utility applicant, provided that all parties shall have been given a reasonable opportunity to conduct discovery in the docket by the time the hearing is held. The commission may accept the settlement agreement as disposing of the matter, and issue an order adopting its terms, if it determines that the terms of the settlement agreement comport with the terms of this act.

The Commission finds that the Settlement Agreement was entered after all parties had a full opportunity to conduct discovery on the matters at issue in this case, and after SCE&G had submitted approximately 326 pages of prefiled testimony and exhibits, setting out in detail the reasons for the changes in the construction schedule and anticipated cost schedules for the project. Furthermore, the direct and settlement testimony of the ORS’s witnesses, Ms. Allyn Powell and Mr. Gary Jones, shows that the ORS’s participation in the Settlement Agreement is based on extensive oversight of costs and construction schedules for the project. Tr. at 717-36, 935-37. Santee Cooper witness Michael N. Couick stated that “[t]he detailed understanding that ORS has developed through its work has allowed it to negotiate a tough settlement that required SCE&G to make some significant concessions that we think will make it more likely that the project will be completed on schedule and without additional cost increases. Keeping the project on schedule and reducing the likelihood of additional cost increases should directly benefit the nearly 1.5 million Cooperative members who will be served by our stake in the project.” Tr. at 695-A. This Commission believes that these benefits would be equally applicable to SCE&G customers.
Based on these facts, the Commission finds that the Settlement Agreement meets the statutory requirements for adoption under S.C. Code Ann. § 58-33-270(G). In this context, the Commission’s task is to review the evidence of record presented by the utility and ORS to ensure that this evidence supports the Settlement Agreement and the terms it encompasses. See S.C. Code Ann. § 58-33-270(G).

As indicated above, the evidence adduced at the hearing in this matter establishes that the proposed changes in estimated capital costs are not the result of any imprudence on the part of SCE&G. Collectively, these items represent the $831.3 million adjustment in the capital cost forecasts for the Units as reflected in the Settlement Agreement and create the total schedule of estimated capital costs for the Units of $7.658 billion.

As to changes in the construction schedules for the project, the Commission recognizes that the substantial completion dates are now the key milestones remaining to be accomplished and the important milestones to be measured. Changes in other milestones would only be relevant in relation to any resulting changes that they cause in those substantial completion dates. The Settlement Agreement will require extensive reporting of multiple milestone schedules, including all of the milestones contained in the schedules presented in Order No. 2015-661, the milestones that will be contained in the forthcoming resource loaded integrated construction schedule being prepared by Fluor, as well as the new milestone payment schedule being formulated under the auspices of the Dispute Resolution Board. As a result, there will be extensive reporting and transparency concerning construction progress going forward.
In this regard, ORS’s statutory oversight and review authority is clear and extensive:

The Office of Regulatory Staff shall conduct on-going monitoring of the construction of the plant and expenditure of capital through review and audit of the quarterly reports under this article, and shall have the right to inspect the books and records regarding the plant and the physical progress of construction upon reasonable notice to the utility.

The Settlement Agreement contains the Moratorium, the prospective ROE reduction and the cap on remaining Amendment Exhibit C costs. In this regard, the Commission finds SCE&G witness Marsh’s settlement testimony to be persuasive concerning the value of settlements in communicating to investors and financial markets that regulation in South Carolina is fair, predictable and reasonable. The Commission believes that settlements of this sort may lower the perceived regulatory risk faced by utilities and therefore improve their ability to raise capital to invest in their utility systems on reasonable terms.

Based on these facts, the Commission finds that the terms of the Settlement Agreement are reasonable, in the public interest and in accordance with the law and regulatory policy. The Commission adopts the Settlement Agreement under the terms of S.C. Code Ann. § 58-33-270 (G).
VIII. PROCEDURAL MATTERS

A. The South Carolina Coastal Conservation League’s Testimony

Prior to the hearing in this matter, SCE&G filed a motion to strike the prefiled direct testimony of the CCL’s witness Alice Napoleon on the grounds that the testimony was not relevant to the issues in this proceeding. Mrs. Napoleon’s testimony analyzed the Company’s energy efficiency efforts, discussed changes or additions to energy efficiency programs that SCE&G could potentially implement, and energy efficiency programs that CCL recommended the Company adopt. Tr. at 305. The sole subject of her testimony was energy efficiency programs.

The Commission deferred a ruling on this motion until after the hearing in this matter. In response to Ms. Napoleon’s testimony, SCE&G filed rebuttal testimony of Keller Kissam. Ms. Napoleon filed surrebuttal testimony in response. The testimony Ms. Napoleon presented lacks any discussion of the changes to the cost or construction schedules for completing the Units or whether there was any imprudence on the Company’s part related to these changes. Although the energy efficiency testimony is likely better presented in the Company’s DSM proceeding, it may suggest methods by which an increase in capital costs to the Company’s customers may be mitigated to some degree. Accordingly, we hold that the testimony may have some relevance in this proceeding, so the Company’s Motion to Strike should be denied.

B. Intervenor Sandra Wright’s Motions

The Intervenor, Sandra Wright, filed a Synopsis with this Commission that contained several Motions. The gravamen of two of these motions is that this Commission
should re-open the original Base Load Review Act determination and terminate any increases granted since. We cannot grant such relief. Our original rulings are the law of the case and are final and binding determinations. See S.C. Code Ann. Section 58-33-275.

Ms. Wright also moves that we place a “cap” on increases. We have discussed the “Fixed Price” option above that limits future ratepayer increases under conditions stated in the Settlement Agreement. Other than approval of this option, no other “cap” on increases is appropriate at this time. These Motions must be denied. Finally, Ms. Wright asks us to remove ORS’s signature from an Agreement. This Commission has no such authority. Accordingly, this Motion must also be denied.

C. Post Hearing Memorandum of the Sierra Club

Counsel for the Sierra Club states that the Commission should reject the requested additional capital costs claimed by the Company where such costs are not sufficiently known and measurable values but are merely values negotiated by the Company and its contractor in settlement of disputed claims. Many of these costs appear in the “Amendment” and in the “Fixed Price Option.” Commission Order No. 2015-661 at 57-61 contained an extensive discussion of the lack of applicability of the “known and measurable” standard to cases under the Base Load Review Act where the use of forecasts was at issue.

As was the case addressed in Order No. 2015-661, the Sierra Club erroneously refers to S.C. Code Ann. Section 58-33-275 (E), the section referring to a utility’s material and adverse deviations from approved schedules. In formulating its challenge to SCE&G’s petition, the Sierra Club confuses the statutory standard that applies to this proceeding. In
proceedings to amend cost or construction schedules that have been previously approved 
under the BLRA, the statutory standard is found in S.C. Code Ann. § 58-33-270(E). See 
South Carolina Energy Users Committee v. South Carolina Electric and Gas, et al, 410 
S.C. 348, 764 S.E. 2d 913 (2014). This section requires the Commission to approve the 
request unless the record supports a finding that the changes in cost or construction 
schedules are the result of imprudence on the part of the utility. The language used by the 
Sierra Club in its Post Hearing Memorandum refers to a different part of the statute, S.C. 
Code Ann. § 58-33-275(E). That section applies where a utility seeks revised rates or other 
relief and it is shown that there has been a material and adverse deviation from the 
previously approved schedules. The present proceeding is not such a proceeding. The 
schedules themselves are before the Commission for review and revision. If the requested 
relief is granted, there will be new approved schedules and the current costs and negotiated 
values will conform to them.

In the end, however, both statutory provisions reference a common standard for 
judging prudence. As pointed out in Order No. 2015-661, prudence in all cases is judged 
based on what a reasonable person, in this case a utility, would do given the information 
available to the utility at the time it could take action to anticipate and avoid an unfavorable 
outcome. Where prudence is concerned, reasonableness of action is measured based on the 
information available at the time meaningful action is possible, not based on information 
that becomes available later when the unfavorable outcome has already begun to 
materialize. In this case, the evidence clearly shows that SCE&G identified risks in a timely 
fashion and took reasonable and timely action to counter them. There is no basis for a

Under the circumstances of this case, if actual costs were not available, negotiated values include the best evidence available today as to anticipated future costs. Also, as discussed in Order No. 2015-661, the Commission found that the known and measurable standard applies when utility rates are being set based on historical test period data. That standard defines the type of out-of-period adjustments that are permitted to the actual test period data.

Under test period ratemaking methodology, an historical test period is selected to measure revenues and expenses to ascertain what rates are appropriate to allow a utility the reasonable opportunity to recover its costs of serving customers and its cost of capital. Pro forma adjustments may be allowed to the actual test period data to reflect changes that will occur after the test period but only if the events they represent are known with certainty to occur and the effects of them are measurable. The integrity of the historical test period data is a key consideration in this approach to rate making. The known and measurable standard ensures that only a limited set of adjustments are made to the test period data and that those adjustments meet a very high standard of certainty. For example, if a utility were to sign a binding wholesale contract that would take effect after the test period closes, and that contract were to be known to reduce the operating costs of the utility to be borne by retail customers, the effect of that contract could be recognized by a pro forma adjustment to actual test period results. The fact of the contract coming into force would be known and
not speculative and its effects on retail expenses and revenues would be measurable and not uncertain.

Here, as in Order No. 2015-661, we conclude that making changes to the schedule of projected costs under the BLRA is not analogous to supplementing actual test year results. The BLRA specifically permits estimates of anticipated costs. Where forward-looking construction cost schedules under the BLRA are concerned, the anticipated costs are all forecasted costs, they are prospective, and in most cases have some degree of uncertainty as to timing and amount.

Applying the known and measurable standard to BLRA cost forecasts would make the BLRA unworkable, since few if any of the costs of prospective base load construction projects are both known and measurable as those terms are understood in historical test period rate regulation. The known and measurable concept simply does not apply in this context.

The Sierra Club quotes with approval the Direct Testimony of Gary C. Jones, an engineer testifying for the Office of Regulatory Staff. Jones testified that certain figures presented by the Company lacked objective documentation, and were merely negotiated values. Despite these statements in Direct Testimony, Mr. Jones later presented Settlement Testimony in which he supported the Settlement Agreement, stating that it was reasonable, and that it represented a collaborative effort to address the concerns raised by ORS and the Settling Parties during their review of the Petition. Tr. at 934-937. If Mr. Jones expressed doubt in his Direct Testimony, he certainly tempered that doubt by his endorsement of the Settlement Agreement in later testimony. As stated above, Mr. Jones testified that “the
Guarantee is the most important aspect of the Settlement Agreement because that provision encourages accountability for construction costs and preserves the benefits to ratepayers from electing the Option.” Tr. at 936.

As previously stated, in this proceeding, SCE&G is presenting the cost changes associated with both the Amendment and the Option for incorporation in the updated BLRA cost forecasts. As to both sets of costs, the determinative question is whether the Commission can determine that “the evidence of record justifies a finding that the changes are not the result of imprudence on the part of the utility.” S.C. Code Ann. § 58-33-270(E).

We cannot say that the Company’s actions were imprudent in negotiating values in this case. Clearly, the BLRA specifically permits estimates of anticipated costs. The negotiated values were reasonable estimates of such costs. Under the terms of the BLRA, they are properly included in the updated cost forecasts for the Units.

In Order No. 2009-104(A), which was the original BLRA ruling on the construction of V.C. Summer Units 2 and 3, the record showed that the risks of proceeding with construction of these Units include licensing and regulatory risks, which include the risk that the NRC or other licensing agencies might delay the project by delaying the issuance of necessary permits, or might change regulatory or design requirements so as to increase costs or create construction delays. Risks of the project considered in that Order also included the risks related to the design and engineering that remains to be done on the Units; risks of procurement, fabrication and transportation related to equipment and components for the Units; construction and quality assurance risks generally; risks related to hiring, training and retaining the personnel needed to construct and operate the Units;
financial and inflation risks; and disaster and weather-related risks. Many of these risks were not quantifiable at the time of the issuance of that Order in 2009.

In ruling on whether the decision to construct Units 2 and 3 was reasonable and prudent in Order 2009-104(A), the Commission had to evaluate the risks of constructing these units compared to the risks of meeting the energy needs of SCE&G’s customers by other means. As Mr. Byrne and Mr. Marsh testified in the original Base Load proceeding, the risks related to other alternatives included the uncertainty as to future CO2 emissions cost; the uncertainty as to future coal and natural gas prices and supplies; the relatively large amount of coal and gas-fired generation already included in SCE&G’s generation mix; the uncertainty as to the future costs and availability of AP1000 units or other nuclear units; the loss of special federal tax incentives if construction is delayed and other factors.

The Commission concluded in Order No. 2009-104(A) that there was no risk-free means to meet the future energy needs of SCE&G’s customers or of the state of South Carolina. Based on the evidence of record, the Commission found that it was reasonable and prudent to proceed with the construction of Units 2 and 3 in light of the information available at that time and the risks of the alternatives, although many of the risks were not specifically quantifiable. A similar principle applies to this Commission’s consideration of the Amendment, the Fixed Price Option, and many of the other costs in the present case. The Company quantified the areas that it could, but formulated a way to present other costs for approval so as to recover prudent costs while protecting the utility’s customers from the responsibility for imprudent costs, in this case, by way of a Settlement Agreement. Order 2009-104(A) at 90-91.
As stated in the *South Carolina Energy Users* case, the purpose of the Base Load Review Act “is to provide for the recovery of the prudently incurred costs associated with new base load plants…when constructed by investor-owned electrical utilities, while at the same time protecting customers of investor-owned electrical utilities from the responsibility for imprudent financial obligations or costs.” S.C. Code Ann. Section 58-33-210 (2015). Both goals are met in this case. As discussed above, this Commission’s adoption of the Settlement Agreement provides for the recovery of the prudently incurred costs associated with the new V.C. Summer units. Adoption of the Settlement Agreement also protects customers of SCE&G from the responsibility for imprudent financial obligations or costs. SCE&G witness Marsh testified as to several features of the Settlement Agreement designed to increase protection of customers: 1) New Liquidated Damages that are four times larger than contained in the original EPC contract; 2) Price Certainty which minimizes SCE&G’s exposure to future cost increases and shifts multiple categories of price risk to Westinghouse; 3) Reduction in Future Disputes by adoption of the Fixed Price Option; and 4) Clarification as to when a change in law will be recognized as supporting a Change Order. Tr. at 57-62.

For all of these reasons, the arguments expressed in the Post-Hearing Memorandum of the Sierra Club must be rejected.

**IX. FINDINGS OF FACT AND CONCLUSIONS OF LAW**

1. The updated capital cost schedule contained in Order Exhibit No. 1 reflects $831.3 million in costs that have not previously been presented to the Commission for review and approval.
2. The evidence in the record demonstrates that $831.3 million in newly identified and itemized costs are not the result of imprudence on the part of SCE&G.

3. The specific components of the $831.3 million in newly identified and itemized costs represent costs that, along with other provisions of the Settlement Agreement, will provide benefits to customers and the project, and include costs which SCE&G must reasonably be expected to pay for completing the Units and preparing to operate them safely, efficiently and reliably.

4. The additional costs that SCE&G is incurring as Owner of the project are not the result of imprudence on the part of SCE&G.

5. The updated milestone construction schedule contained in Order Exhibit No. 1 reflects the delay in the substantial completion dates of Unit 2 until August 31, 2019, and of Unit 3 to August 31, 2020. The evidence shows that SCE&G was not imprudent in its management of this aspect of the project.

6. The Settlement Agreement fully conforms to the terms of S.C. Code Ann. § 58-33-270(G) and its terms comport with the terms of the BLRA and are supported by the evidence.

7. The Motion to Strike the Direct Testimony of CCL witness Napoleon and the Motions contained in the Sandra Wright Synopsis should be denied.

8. The arguments presented in the Post Hearing Memorandum of the Sierra Club should be rejected.
Now, therefore,

**IT IS HEREBY ORDERED:**

1. That the Settlement Agreement attached hereto as Order Exhibit No. 1, is approved and the terms therein shall be accepted and adopted by this Order pursuant to S.C. Code Ann. § 58-33-270(G).

2. That it is this Commission’s expectation that SCE&G will provide updates to this Commission regarding the progress of the V.C. Summer project through the Commission’s allowable ex parte procedure no less than twice a year until further notice.

3. That the construction milestones schedule set forth in Exhibit 1 to the Settlement Agreement shall be the approved construction milestone schedule for the Units for purposes of the administration of the Base Load Review Act unless and until such time as the Commission approves a substitute schedule pursuant to S.C. Code Ann. § 58-33-270(E). The Company shall report on the results of Fluor’s review and revision to the resource-loaded integrated project schedule when completed.

4. That the capital cost schedule set forth in Exhibit 2 to the Settlement Agreement shall be the approved capital cost schedule for the Units for purposes of the administration of the Base Load Review Act unless and until such time as the Commission approves a substitute schedule pursuant to S.C. Code Ann. § 58-33-270(E).

5. That the future quarterly reports filed by SCE&G under S.C. Code Ann. § 58-33-277 shall reflect the modified schedules approved in this Order and the additional information required by the Settlement Agreement. The Company shall also include in its future quarterly reports data regarding both production and productivity as compared to
what is forecasted in Fluor’s revised fully resource-loaded integrated construction schedule, as well as construction progress towards the milestone payments that are contained in the milestone payment schedule.

6. That SCE&G is encouraged to take all actions available to ensure that it qualifies for production tax credits.

7. That the Motion to Strike the direct testimony of CCL witness Napoleon and the Motions contained in the Synopsis of Sandra Wright are denied.

8. That the arguments presented in the Post Hearing Memorandum of the Sierra Club are rejected.

9. That this Order shall remain in full force and effect unless and until modified by a subsequent order of the Commission.

BY ORDER OF THE COMMISSION:

Swain E. Whitfield, Chairman

ATTEST:

Comer H. Randall, Vice Chairman
BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2016-223-E

September 1, 2016

IN RE:

Petition of South Carolina Electric & Gas Company for Updates and Revisions to Schedules Related to the Construction of a Nuclear Base Load Generation Facility at Jenkinsville, South Carolina

) ) ) ) ) ) ) )

SETTLEMENT AGREEMENT

This Settlement Agreement ("Settlement Agreement") is made by and among the South Carolina Office of Regulatory Staff ("ORS"); the Central Electric Power Cooperative, Inc. ("Central"); the Electric Cooperatives of South Carolina, Inc. ("The Cooperatives"); Frank Knapp, Jr; South Carolina Energy Users Committee ("SCEUC"); and South Carolina Electric & Gas Company ("SCE&G" or the "Company") (collectively referred to as the "Parties", "Settling Parties", or sometimes individually as a "Party").

WHEREAS, on May 26, 2016, SCE&G filed a petition ("Petition") with the Public Service Commission of South Carolina ("Commission") requesting an order from the Commission approving SCE&G’s updated capital cost schedule and updated construction schedule for the construction of two 1,117 net megawatt nuclear units ("Units" or "Units 2 and 3") to be located at the V.C. Summer Nuclear Station near Jenkinsville, South Carolina, as well as the Commission’s approval of SCE&G’s decision to exercise an option ("Option") in the October 2015 Amendment

1 Pro se and President and CEO of the South Carolina Small Business Chamber of Commerce.
("Amendment") to the Engineering, Procurement and Construction Agreement (the "EPC Contract") that would move many of the EPC Contract costs to a fixed price category;

SCE&G filed its Petition pursuant to S.C. Code Ann. § 58-33-270(E) (2015) of the Base Load Review Act ("BLRA"), which states:

(E) As circumstances warrant, the utility may petition the commission, with notice to the Office of Regulatory Staff, for an order modifying any of the schedules, estimates, findings, class allocation factors, rate designs, or conditions that form part of any base load review order issued under this section. The commission shall grant the relief requested if, after a hearing, the commission finds:

(1) as to the changes in the schedules, estimates, findings, or conditions, that the evidence of record justifies a finding that the changes are not the result of imprudence on the part of the utility; and

(2) as to the changes in the class allocation factors or rate designs, that the evidence of record indicates the proposed class allocation factors or rate designs are just and reasonable.

SCE&G states in its Petition that circumstances warrant modifying the schedules approved in the most recent Base Load Review order because in September 2015 Westinghouse Electric Company ("WEC") and Chicago Bridge & Iron ("CB&I") ("Consortium") approached SCE&G and Santee Cooper about CB&I’s desire to exit the project. Negotiations ensued leading to an agreement reached on October 27, 2015, between SCE&G and WEC to amend the EPC Contract. The Amendment allowed CB&I to exit the project and required WEC to assume sole responsibility for the project going forward. WEC additionally granted SCE&G an option to convert the EPC Contract to a "fixed-price" agreement that incorporated many of the EPC Contract costs into a total fixed price;

SCE&G has requested Commission approval of an updated Milestone Schedule (Exhibit 1 to the Application) which reflects new guaranteed substantial completion dates ("GSCDs") for Units 2 and 3 of August 31, 2019, and August 31, 2020, respectively;
The Amendment resolved most outstanding disputes under the EPC Contract and increased the EPC Contract price by $137.5 million over the estimate approved by the Commission in Order No. 2015-661. The increase in EPC Contract cost under the Amendment does not include reversing a credit of $85.5 million for liquidated damages which SCE&G had included in previous cost estimates. The Option offered by WEC to SCE&G to convert the EPC Contract to an agreement that incorporated many of the EPC Contract costs into a total fixed price, represents an increase to the Total Gross Construction Cost of $505.54 million for a total cost for WEC to complete all scopes of work covered by the Option from July 1, 2015, through completion of the project of $3.345 billion, with exceptions for Transmission and Owner's Costs, as well as certain Time and Materials ("T&M") scopes of work, valued at approximately $38.3 million;²

Exhibit 1 to the Application indicates that it will take WEC and its construction manager Fluor Corporation, Nuclear Division ("Fluor") until August 31, 2019, and August 31, 2020, to complete Units 2 and 3, respectively, and that the additional costs associated with the Amendment and reflected in the updated capital cost schedule will be incurred to complete construction of the Units in light of CB&I's exit from the project;

After an extensive review, SCE&G determined that circumstances warranted petitioning the Commission, under the BLRA, to approve the Amendment, including the Option, in order to update the approved construction and capital cost schedules to reflect changes to these schedules based on the terms of the Amendment and the Option. SCE&G has modified, and submitted for consideration and approval of the Commission the BLRA Milestone Construction Schedule, as reflected in Settlement Exhibit 1 attached hereto, to align remaining BLRA Milestones as approved in Order No. 2015-661 to the new Substantial Completion Dates and to the current construction and fabrication schedules;

² All dollar amounts herein represent SCE&G's 55% share of the costs of constructing the Units.
As stated in its Petition, SCE&G also requests approval from the Commission to exercise the Option provided for under the Amendment to the EPC Contract and approval of the capital cost schedule for completion of the Units, as reflected in Settlement Exhibit 2, attached hereto, to reflect (a) the effects of the new Substantial Completion Dates on Owner’s costs and EPC Contract costs, and (b) other changes in costs that have been identified since the issuance of Commission Order No. 2015-661;

ORS is automatically a party to this proceeding pursuant to S.C. Code Ann. §58-4-10(B) (2015). In connection with this case as well as since the inception of this project, ORS has exercised its rights and fulfilled its responsibilities under S.C. Code Ann. § 58-33-277 (2015) to monitor the status of the project, by, among other things, routinely and regularly observing the progress of the plant construction and submodule production, requesting and reviewing substantial amounts of relevant financial data when made available by the Company, auditing the quarterly reports submitted by the Company pursuant to the BLRA, inspecting the books and records of the Company regarding the plant and physical progress of construction, and reviewing to the extent possible SCE&G’s request to enter into the Amendment to the EPC Contract and modify the Units’ construction and capital cost schedules; and

The Commission established Docket No. 2016-223-E in which to hear the Company’s request set forth in the Petition, has allowed for public comment and intervention in the above-captioned docket, and has granted the Motions to intervene in this docket by SCEUC, Central and The Cooperatives:

NOW THEREFORE, WHEREAS, the Settling Parties have varying positions regarding the issues in this case, have engaged in discussions to determine if a Settlement Agreement would be in their best interest; and have each determined that their interest and/or the public interest would be best served by agreeing to settle the issues in the above-captioned case under the terms
and conditions set forth in this Settlement Agreement, the Settling Parties hereby stipulate and agree to the following:

A. STIPULATION OF SETTLEMENT AGREEMENT, TESTIMONY AND WAIVER OF CROSS-EXAMINATION

1. The Settling Parties agree to stipulate into the record before the Commission this Settlement Agreement.

2. The Settling Parties agree to stipulate into the record before the Commission the prefiled testimony and exhibits (collectively “Stipulated Testimony”) of the following witnesses without objection, change, amendment, or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction consistent with this Settlement Agreement. The Settling Parties agree that no other evidence will be offered in the proceeding by them other than the Stipulated Testimony and exhibits and this Settlement Agreement unless 1) Settlement Testimony supporting this Settlement Agreement is filed by the Settling Parties or 2) additional evidence is necessary to support the Settlement Agreement. The Settling Parties also reserve the right to engage in redirect examination of witnesses as necessary to respond to issues raised by the examination of their witnesses, if any, by non-Settling Parties or by testimony filed by non-Settling Parties, and any such testimony shall be supportive of the terms of this Settlement Agreement.

SCE&G witnesses:
1. Kevin B. Marsh
2. Stephen A. Byrne
3. W. Keller Kissam
4. Jimmy E. Addison
5. Joseph M. Lynch
6. Kevin R. Kochems

ORS witnesses:
1. Allyn Powell
2. Gary Jones
Any testimony, whether direct, rebuttal, or surrebuttal, filed by the Settling Parties after the signing of this Settlement Agreement must be consistent with the terms of the Settlement Agreement. If the Settling Parties determine that rebuttal or surrebuttal testimony should be filed in response to any testimony filed by any Intervenor that is not a signatory to this Settlement Agreement, then the Settling Parties hereto agree that any such testimony likewise would be stipulated into the record before the Commission under this Settlement Agreement without objection, change, amendment, or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction consistent with this Settlement Agreement.

B. SETTLEMENT TERMS

3. SCE&G has identified approximately $137.5 million in additional capital costs that it deems as reasonable and necessary for completion of the construction of the Units through the delayed Substantial Completion Dates. These additional capital costs were made a part of the EPC Contract via the Amendment and have been assigned to specific cost categories as reflected and included in Settlement Exhibit 2. In the context of this settlement, the Settling Parties agree not to contest the inclusion of these costs in the updated capital cost schedules, included in Settlement Exhibit 2.

4. The $137.5 million increase in EPC costs does not include the reversal of an additional $85.53 million in liquidated damages which would have been fully earned by SCE&G based on the Consortium’s failure to meet the forecasted completion dates of Units 2 and 3 had the Amendment to the EPC Contract not been executed. This $85.53 million in liquidated damages was credited to SCE&G’s ratepayers in Commission Order No. 2015-661. In the context of this settlement, the Settling Parties agree not to contest the inclusion of these costs, previously credited
to ratepayers, through the reversal of this credit in the updated capital cost schedules in Settlement Exhibit 2 subject to certain conditions as detailed below.

5. ORS and the Settling Parties have reviewed the Option, the scope of work necessary to complete the EPC Contract and the Sensitivity Analysis prepared by SCE&G Witness Joseph M. Lynch. The Settling Parties agree that, based on the sensitivity study presented in SCE&G Witness Lynch’s testimony and the work remaining, the $505.54 million price for SCE&G to exercise the “Fixed Price” option amendment to the EPC Contract appears to be cost beneficial to the Company and its ratepayers given the current circumstances. In the context of this settlement, the Settling Parties agree not to contest the Company’s exercising of the Option and the inclusion of these costs in the updated capital schedules, included in Settlement Exhibit 2, subject to SCE&G agreeing to certain conditions as provided below.

6. The Settling Parties agree to permit inclusion in the BLRA-approved capital cost schedule for the Units $32.58 million of the Company’s requested $52.45 million in costs for Change Orders. Of the $32.58 million, the following Change Orders, totaling $8.83 million, are accepted as proposed in the Company’s Testimony: Training Staff Augmentation, Escrowing, Transmission, CAP-I, ITAAC Maintenance, PMP Analysis, Classroom Simulator, and Primavera costs. With respect to Plant Layout Security, Phase 3 and Plant Security Systems Integration, amounts of $17.39 million and $6.32 million, respectively, shall be included in the BLRA-approved capital cost schedule for the Units. The amounts for Plant Layout Security, Phase 3 and Plant Security Systems Integration, totaling $23.75 of the $32.58 million, represent the latest available data at the time of this Settlement, not final proposals or signed Change Orders, and the Settling Parties recognize that the Company may update the costs associated with these Change Orders in future BLRA proceedings consistent with the terms of this Settlement Agreement. As for the Service Building, Third Floor, the Settling Parties agree that SCE&G shall transfer the
associated amount from the Fixed Price category to the Owner’s Cost category and the amounts shall be included in the BLRA-approved capital cost schedule along with any associated escalation and AFUDC. Specifically for the Service Building, including the Third Floor, SCE&G agrees to reduce the Fixed Price category in the amount of $11.92 million, which includes the $6.9 million requested in this Petition for the Service Building, 3rd Floor and the $5.02 million already in the Fixed Price for the Service Building, 1st and 2nd Floor, and increase the Owners Cost category in the amount of $10.48 million (which includes escalation), and to not seek recovery from ratepayers in any future proceeding for any costs in excess of $10.48 million for the Service Building. After execution of the Change Order between SCE&G and WEC regarding the Service Building, SCE&G will provide a copy of the Change Order to ORS and if necessary, SCE&G will adjust the Owners Cost category consistent with the terms of this Settlement.

7. SCE&G has additionally identified and requested in its filing an increase to its Owner’s Costs of $20.83 million. These additional costs are generally attributable to the requested extension of the duration of the construction project to complete Units 2 and 3 and also reflect the refinement of previous cost estimates as certain costs related to operations and the start-up period are now better known. These costs have been assigned to specific cost categories that are detailed and included in Settlement Exhibit 2. In the context of this settlement, the Settling Parties agree not to contest the inclusion of these costs.

8. The Settling Parties agree that SCE&G shall not include in the BLRA-approved capital cost schedule at this time the additional $4.3 million in Transmission costs requested by the Company in its Petition. The basis for these costs is not yet well known as the final methodology for switchyard modifications has not yet been determined. The Company may seek inclusion of these Transmission costs in future BLRA proceedings.
9. SCE&G has further sought AFUDC and other escalation costs of approximately $44.7 million, which the Settling Parties understand will be adjusted in accordance with the BLRA. These are currently estimated at $45.18 million.

10. SCE&G seeks approval of the updated BLRA milestone schedule, included as Settlement Exhibit 1, which the Company claims reflects the planned construction schedule necessary to complete the Units by the Guaranteed Substantial Completion Dates of August 31, 2019, for Unit 2 and August 31, 2020, for Unit 3. In the context of this settlement, the Settling Parties agree not to contest the construction schedule submitted by SCE&G. However, recognizing that Fluor’s full input into the construction schedule is not yet available and that these BLRA milestones reflect construction milestones established by a previous construction contractor, the Settling Parties agree, for the purposes of BLRA compliance, that the Substantial Completion Dates will be the only Commission-approved BLRA milestones for the balance of the project and will be the only milestones considered when assessing BLRA compliance with the Commission-approved construction schedules, subject to the 18 month window described in Order No. 2009-104(A), page 123. Upon Fluor completing a fully resource loaded integrated schedule as approved by Westinghouse, SCE&G will provide a report based on this schedule to ORS and the Commission that includes the current dates for the BLRA milestones set forth in Exhibit 1 of SCE&G’s Petition in this Docket as well as construction payment milestones outlined in the revised milestone payment schedule. Prior to the completion and approval of the fully resource loaded integrated schedule SCE&G will provide status updates on the schedule in its quarterly reports and SCE&G agrees to provide updates on the status of both BLRA and construction payment milestones in its quarterly reports through the end of the project. SCE&G also agrees to include data on construction and craft staffing, productivity and production in its quarterly reports,
and to provide to ORS a method to compare productivity pre and post-Fluor’s resource loading of the construction schedule.

11. SCE&G agrees to detail and report all milestone payments made in accordance with the milestone payment schedule in each quarterly report through the completion of the project and, in the event that the milestone payment schedule has not been resolved by the time of the hearing in this docket, to report on the status of the milestone payment dispute in its next quarterly report.

12. In this proceeding, SCE&G has requested that the Commission approve, pursuant to S.C. Code Ann. § 58-33-270(E), changes in the forecasted schedule of cost of the project consistent with the Amendment. SCE&G has also requested that the Commission approve the exercising of an Option included in the Amendment, which converts many of the EPC Contract costs into a fixed price category. As set out in the Petition, the additional cost of $505.54 million associated with the Option would cover all work within the scope of the existing EPC Contract and Amendment, excluding certain “Time and Materials Work” currently valued at approximately $38.3 million. ORS and the other Intervenor Settling Parties have reviewed the Option, the scope of work necessary to complete the EPC Contract and the Sensitivity Analysis prepared by SCE&G Witness Joseph M. Lynch. The Settling Parties agree that the payment for the option will not be contested, provided that SCE&G takes certain steps to ensure that ratepayers retain the benefit of the fixed price. SCE&G therefore agrees to fix the price to consumers for EPC Contract costs according to the terms of this Settlement. To effect this, SCE&G agrees that it will not file any future requests with the Commission seeking any additional or updated budget increases related to the construction of Units 2 and 3 unless such request(s) are related to signed change orders; Transmission Costs; Time and Materials costs specifically outlined in Paragraph 2, Page 1 of the Option that relate to sales tax, performance bond and insurance premiums, import duties, and mandatory spare parts and extended equipment warranty costs not covered in paragraph 6 of the
Amendment; costs associated with decisions of the Dispute Review Board adverse to SCE&G; costs associated with the issues listed in Exhibit C of the Amendment; or Owners Costs under certain conditions. Owners Cost increases will only be considered if they are related to staffing costs due to delays or are new costs not identified at the time of this filing. Owners Cost increases shall not be considered if they involve a transfer of scope from Westinghouse's Fixed Price category unless SCE&G can complete the scope of work pursuant to a contract that fixes the price in an amount equal to or less than the amount of the credit provided by Westinghouse in the Credit Change Order that moves the scope of work from Westinghouse to SCE&G. SCE&G may also apply for increases in any category that are attributable to changes in law, as defined in Paragraph 14 of the Amendment to the EPC Contract. With respect to Exhibit C of the Amendment, which contains a list of items not resolved or released under the Amendment, SCE&G agrees that it will not request increases in costs in a future modification proceeding exceeding $20 million in total for the items on Exhibit C, excluding Plant Layout Security, Phase 3 and Plant Security Systems Integration. SCE&G further agrees to inform ORS of all changes in cost projections from those contained in Settlement Exhibit 2 and to document all changes in cost projections in its quarterly reports to ORS and the Commission.

13. With respect to those costs not covered by the prohibition described in paragraph 12 of this Settlement Agreement, SCE&G further agrees that it will not file any future modification requests with the Commission for amendments to the capital cost schedules related to the construction of Units 2 and 3 prior to January 28, 2019.3 The Settling Parties agree that this

---

3 If the projected commercial operation date for Unit 2 of August 31, 2019, is extended, then the expiration of the January 28, 2019 moratorium, as set forth throughout this Agreement, shall be extended in an equal amount of time. Any such extension of the moratorium, however, shall not apply to any modification request for increases in any category that are attributable to changes in law as defined in Paragraph 14 of the Amendment to the EPC Contract. Accordingly, SCE&G may file a modification request for increases in any category that are attributable to changes in law any time after January 28, 2019.
moratorium will not prohibit SCE&G from seeking recovery through revised rates for Commission-approved costs prudently incurred in accordance with Settlement Exhibits 1 and 2 or as otherwise allowed by Paragraph 12. The Company will not seek revised rates reflecting costs incurred in excess of those approved in this Docket prior to January 28, 2019. The Settling Parties agree that the moratorium described in this paragraph will be revoked should a revised rates request be denied due to SCE&G's adherence to the modification moratorium.

14. The Settling Parties agree that a decision regarding the reasonableness or prudence of any bonus incentives pledged by SCE&G to WEC under the terms of the EPC Contract or Amendment will be delayed and not included in any filing prior to January 28, 2019. The Settling Parties reserve the right to contest any such bonuses in future proceedings.

15. SCE&G agrees to take any and all actions necessary to exercise its rights under the EPC Contract or Amendment to require WEC to escrow certain engineering intellectual property and to include in all future quarterly reports the status of its efforts to have the intellectual property

---

4 SCE&G, pursuant to S.C. Code Ann. § 58-33-280 (2015), will file a final set of revised rates seven months before the projected date that the Units are to commence commercial operations. For any costs subject to the moratorium that arise after the Commission's order issued in this Docket, SCE&G intends to file a petition for updates and revisions to the capital cost schedule before those costs may be included SCE&G's final set of revised rates. Therefore, the moratorium date of January 28, 2019, will allow SCE&G the opportunity to file a petition for updates and revisions to the capital cost schedule in advance of SCE&G filing its final set of revised rates. However, if the projected commercial operation date for Unit 2 of August 31, 2019, is extended, then the expiration of the January 28, 2019 moratorium, as set forth throughout this Agreement, shall be extended in an equal amount of time. Any such extension of the moratorium, however, shall not apply to any modification request for increases in any category that are attributable to changes in law as defined in Paragraph 14 of the Amendment to the EPC Contract. Accordingly, SCE&G may file a modification request for increases in any category that are attributable to changes in law any time after January 28, 2019. If such modification request is granted, then, notwithstanding the moratorium, SCE&G may include those approved costs related to change in law in subsequent revised rates filings as the costs are actually incurred.

5 If the projected commercial operation date for Unit 2 of August 31, 2019, is extended, then the expiration of the January 28, 2019 moratorium, as set forth throughout this Agreement, shall be extended in an equal amount of time. Any such extension of the moratorium, however, shall not apply to any modification request for increases in any category that are attributable to changes in law as defined in Paragraph 14 of the Amendment to the EPC Contract. Accordingly, SCE&G may file a modification request for increases in any category that are attributable to changes in law any time after January 28, 2019.
escrowed. SCE&G will continue to report on the status of the escrow of intellectual property in quarterly reports through completion of the project.

16. In sum, the Amendment, the Option and other modifications detailed in SCE&G’s Application sought an increase in the capital cost for the Units of $852 million to a total $7.68 billion for the Units with escalation as reflected in Application Exhibit 2. The Settling Parties hereby agree, as detailed above, to an increase of $831.3 million (a reduction of $20.45 million from the requested increase of $852 million) for a total estimated of approximately $7.658 billion in current dollars as reflected in Settlement Exhibit 2, subject to the terms of this Settlement Agreement.

17. The Settling Parties also agree that the restated and updated capital cost schedule detailed in Settlement Exhibit 2 attached hereto, should be approved by the Commission as the new construction expenditure schedule for completion of the Units. Specifically, Settlement Exhibit 2 should replace and supersede Order Exhibit No. 2 of Order No. 2015-661.

18. By Commission Order No. 2015-661, the Commission established a return on equity of ten and one-half percent (10.5%), which is applicable for revised rates filings made on or after January 1, 2016, under the Base Load Review Act. As a condition of this Settlement Agreement and for Base Load Review Act purposes only, beginning with any revised rates filing made on or after January 1, 2017, and prospectively thereafter until such time as the Units are completed, SCE&G agrees to develop and calculate its revised rates filings using ten and one-quarter percent (10.25%) as the return on common equity rather than the approved return on common equity of ten and one-half percent (10.50%) subject to Paragraph 23 hereof.67

6 The Electric Cooperatives and Central do not take a position regarding a reduction in SCE&G’s return on common equity.

7 Any revised rates placed into effect prior to January 1, 2017, shall not be affected by this Settlement Agreement, and the Settling Parties specifically agree that Paragraph 18 of the Settlement Agreement is not intended to require SCE&G to provide any offset, credit, refund, reimbursement, or other compensation to customers for rates
19. The Settling Parties agree that the terms of this Settlement Agreement are reasonable, in the public interest and in accordance with law and regulatory policy.

20. ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code Ann. § 58-4-10(B) (2015). S.C. Code Ann. § 58-4-10(B)(1) through (3) reads in part as follows:

"...‘public interest’ means a balancing of the following:

(1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
(2) Economic development and job attraction and retention in South Carolina; and
(3) Preservation of the financial integrity of the State’s public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

21. The Settling Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable and full resolution of all issues in the above-captioned proceeding, and shall neither take any position contrary to the good faith duty agreed to herein nor encourage or aid any other Intervenors to take a position contrary to the terms of this Settlement Agreement. The Settling Parties agree to use reasonable efforts to defend and support any Commission order with no other provisions issued approving this Settlement Agreement and the terms and conditions contained herein.

22. The Settling Parties request that the Commission hold a hearing on this Settlement Agreement, pursuant to S.C. Code Ann. § 58-33-270(G) (2015), simultaneously with the hearing considered and approved by the Commission and placed into effect prior to January 1, 2017. The reduction in the Company's return on equity shall only be prospectively applied for the purpose of calculating revised rates sought by the Company on and after January 1, 2017, until such time as the Units are completed and for Base Load Review Act purposes only.
on the merits of the Petition, which is currently scheduled to begin on October 4, 2016, and request that the Commission adopt this Settlement Agreement as part of its Order in this proceeding. In furtherance of this request, the Settling Parties stipulate and agree that the terms of this Settlement Agreement comport with the terms of the BLRA.

23. This Settlement Agreement contains the complete agreement of the Settling Parties. There are no other terms and conditions to which the Settling Parties have agreed. The Settling Parties agree that this Settlement Agreement will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement, or any of the matters agreed to in it, be used as evidence or precedent in any future proceeding, provided, however, that the provisions of S.C. Code Ann. §§ 58-33-275(A) and (B) shall apply to any order of the Commission adopting, approving, or accepting this Settlement and no party shall take a contrary position in any future proceeding. Any Party may withdraw from the Settlement Agreement without penalty if (i) the Commission does not approve this Settlement Agreement in its entirety; (ii) an appellate court does not affirm in all respects the Commission’s order approving this Settlement Agreement in its entirety; or (iii) the Commission or an appellate court does not affirm or apply the provisions of this Settlement Agreement in future proceedings while it is in force. If a Party elects to withdraw from the Settlement Agreement pursuant to this paragraph, then the provisions of this Settlement Agreement will no longer be binding upon the Settling Parties.

24. This Settlement Agreement shall be effective upon execution by the Settling Parties and shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Settling Parties hereto. Therefore, each Settling Party acknowledges its consent and agreement to the terms and conditions of this Settlement Agreement by affixing his or her signature or authorizing its counsel to affix his or her signature to this document where indicated below. Counsel’s signature represents his or her representation that his
or her client has authorized the execution of the Settlement Agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

*Applicable index escalation rates for 2016 are estimated. Escalation is subject to customer review and actual indices for 2016 are fixed.*

**Notes:**
- Current Period AFUDC rate applied

Escalation rates vary from reporting period to reporting period according to the terms of Consolidated Order 2008-1064AL.
- These projections reflect current escalation rates. Future changes in escalation rates could substantially change these projections.
- The AFUDC rate applied to the current SCE&G rates. AFUDC rates may vary with changes in market interest rates.
- SCE&G’s outstanding cost of capital, capitalization ratios, construction work in progress, and SCE&G’s short-term debt outstanding.
